ALG = Advanced Lane Guidance

IQR = IQ Routes Technology

ASR = Advanced Speech Recognition

Cspeech = Files used by ASR HNR = House Numbering, It's for Russia & Greece that don't use a conventional numbering system in some areas.

Maps are navcore specific, rather than device specific. The rows are the map versions for the map Edition that the chart is supporting.

The columns are the various navcores in use (not all navcores are listed). If you don't see your navcore listed, read between the lines of the navcores that are older & newer than yours. If the point, where a row & a column cross, has a Y in a green box, then that navcore/map combination is

compatible. Europe Truck 910.4958 requires Truck Navcore 9.700 or 9.7100 to utilize all of the Truck features. Map Chart Update = 16.05.13
